

ANNA CHOWATTANAKUL

Front-End Developer

WORK EXPERIENCE

Full-stack developer at Codeboxx *July 2020 - Present*
Lucky Brand Project (E-commerce)

- Improved site accessibility and SEO by reworking product listing pagination from using infinite scroll to load more button and implementing push state to update url when more items are loaded
- Optimized the site for mobile by making all components more responsive using flexbox in close collaboration with designer
- Optimized the site for speed by refactoring css styles resulting in reduction of over 400 lines of css
- Built new product filter feature from the ground up to improve performance and to make it work on both desktop and mobile
- Reported and fixed various critical bugs throughout the site including lazy loading images not showing, broken product customization options, broken product sorting, broken links, missing product information
- Worked with various web technologies including HTML, CSS, JS, SASS, Ajax, jQuery, Gulp
- Worked with various platforms and tools including, Salesforce Commerce Cloud, Eclipse IDE, VSCode, Bitbucket, GitHub and Jira

PROJECTS

Rocket Elevators *Jan - May 2020*
Ruby on Rails

- Created web and mobile applications for a fictional elevator company using Ruby on Rails and React Native
- Developed backend REST API with C# .NET Core, MySQL, Postgres and deployed to Azure.
- Worked with dialogue flow to create a chatbot on slack to interact and send real time updates to users
- Integrated the app with SendGrid for email and reCAPTCHA for spam reduction
- Deployed web application to AWS with NGINX and automate deployment with Capistrano
